

February 19, 2007

Dear Pieramid Foundation Systems,

We have been using your product over the last couple of years and I would just like to personally thank your company's contributions to our industry.

We have exceeded all of our revenue and profit projections for 2006 in these following areas:

Your products carry high margins for us as the retailer and high value to our customers.

We have realized a direct cost benefit to using your product in the areas of labor and safety due to your products superior strength and ease of installation.

Our construction manager saves time and money pulling permits using your easy to read site specific engineering plans that every building inspector HAS to follow rather than multiple interpretations of the setup manuals.

We have saved thousands on fuel, insurance and vehicle repairs by being able to bring all of our building materials to site with one regular size pickup truck.

We have an increased overall customer satisfaction because they know that they are getting a fully engineered foundation for their protection as well as the engineering qualifying them for a FHA/VA financing.

Finally, and most importantly, we have sold more homes this year because our lenders approve your HUD compliant products which makes doing FHA/VA loans a breeze..

We at Home Boys truly appreciate your company's commitment to quality and customer excellence. We look forward to building our future on the tops of your foundations.

Sincerely,

Steven K, Randock Jr.
